### ABSTRACT

The Examistic System is a new paradigm in the field of information technology today. All parties are starting to pay attention to innovation and technological developments, which happen often, especially in the field of education. It may meet educational requirements and provide instructors and students who utilize such systems a variety of advantages. Additionally, it may enhance the fun of both teaching and learning. At all levels, including secondary, post secondary, and continuing education, it is still underused. The goal of this study was to gather literacy research on the usage of the examistic system. Its goal is to evaluate the qualities that persuade people to adopt the examistic method. The study examined the system's effectiveness in terms of internet accessibility, security, and testing and evaluating instructional materials.

---

### I. INTRODUCTION

The current method has significantly improved thanks to technology throughout time. Internet based self-learning has taken the place of traditional rote learning. The learning website blends content, media, and technology to increase students' motivation to learn and enjoyment of the process. Users are also encouraged to customize their learning. The present study in this area tries to examine a wide range of areas. This initiative also highlights website features and improves user learning. Examistic is a platform that makes it simple and fast for students from schools, universities, and other institutions to take tests. You are also given the results immediately after the test. Students need to have a working user ID and password in order to take the test. This test consists of multiple choice questions with the appropriate number of answers. The number of options is limitless and it is possible to randomize it. A deadline has been set for finishing this test assignment. The person may examine their results after finishing the test.

### II. PROPOSED SYSTEM

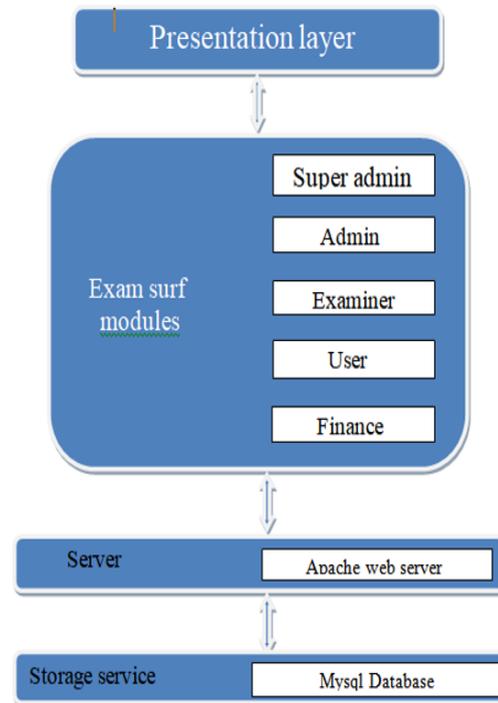

In this project, we provide an online Examistic that allows for the administration of mock examinations and exams of various kinds. We keep track of all test types on one same platform. This project consists of 5 parts.

- o Super Admin
- o Admin
- o User/Student
- o Examiner/Staff
- o Finance

**Features:**

- A piece of software will automatically grade the MCQ.
- Job board.
- Visual learning through videos.
- Individualized themes.
- The award of certificates.
- Job cron.

### III. SYSTEM ARCHITECTURE

### IV. RESULTS AND DISCUSSION

Serial No.	Condition To be Tested	Expected Result	Result
1.	On the load of the login form.	No data should be supplied.	PASS
2.	When the student does not enter any fields and clicks "login"	Should display an error message "please enter register number and password"	PASS
3.	When the student does not enter a valid registration number and password.	Should display the error message "invalid register number and password".	PASS
4.	When the student does not enter a password.	Should display the error message "failed to login".	PASS
5.	When the user enters the password and username and clicks login.	Should go to the home page.	PASS

### V. CONCLUSION

Examistic is a web-based software programmed that enables a business or educational institution to organize and manage tests. The Internet, an intranet, or LAN setups may all be used for this. The goal of this study is to develop an online testing platform that can be used in network labs at any institution. The technology drastically cuts down on the amount of time needed to conduct the test and communicate the results. Professors will be able to ask students questions using a straightforward graphical user interface, and the exam will consist of objective questions. Examistic is an eLearning platform that offers students access to a range of discussion forums, study guides, and mock examinations, among other things. It is not just a website for taking online tests.

E-Learning may be regarded as a modern innovation since its influence on education has been shown. eLearning is a great option for creating an active learning platform since it is very beneficial and growing in popularity. In order to enhance teaching and learning, it is essential for both educators and students to understand how to set acceptable eLearning goals. Examistic is a website that combines eLearning and online

test capabilities to help users make the most of the platform.
